Turnarounds

**When the pressure is on
to get the job done,
the distribution of
supplies should be
the least
of your concerns.**

Job Site Distribution

DXP's SmartSourceSM takes the worry out of dispensing critical supplies during turnarounds, shutdowns, outages and emergencies. Through a fully equipped mobile distribution center strategically located at your job site, supplies and services are dispensed, day or night, until your job is done. Our services increase worker productivity, reduce your costs and provide full accountability of supply usage.

**when
you
need them,**

Proven Solutions in Reducing Overall Costs

Controlling the procurement and distribution of equipment and supplies used for large maintenance and construction projects is a critical part of overall cost control. DXP's SmartSource provides the management and control needed to help keep your project within budget. We handle the procurement of critical equipment and supplies to all site workers through our Job Site Solutions program. Our services provide project managers a real opportunity to authorize and control the products used on site and to avoid the waste and "price stacking" effect inherent to many large construction projects. Our real-time, computer based data retrieval and management systems provide immediate or routine reporting for supply distribution with an unassailable audit trail.

On-Site Order Entry System

Our on-site order entry system facilitates fast, easy entry of orders by your personnel right from their work area. Additional features include cost center tracking and barcode scanning. Custom order numbers, specified by you, can be incorporated to simplify the process and to control product selection.

Purchase Card

SmartSource offers a unique purchase card program customized for your specific needs. We supply an individualized card for each employee authorized to make purchases of equipment. Detail reporting and summary invoices are also available.

**Barcoding,
scanning and
personalized purchase
card capabilities**

Summary Invoicing

A special database systems allows SmartSource to provide our customers with a variety of summary invoice options that can be provided separately or as a part of one of our integrated supply programs. All items purchased are summarized in a single invoice, simplifying administration and reducing costs.

Custom Stocking

Custom bin and floor stocking programs are available from SmartSource. Stock is maintained at predetermined levels by our personnel, assuring an uninterrupted supply of critical products.

Custom Programs

Flexibility is the key to our success. SmartSource is uniquely qualified to design and implement custom programs to meet your needs. Just-in-time delivery programs, inventory management programs, and other services are available to our customers.

**where
you
need them.**

Designed for contract maintenance and construction contractors.

Meets demands by providing an on-site warehouse.

Fully stocked with all MROP items necessary for your project.
