

The **PumpWorks[™]** INDUSTRIAL ANSI Difference

► 100% MADE IN THE USA: WITH AMERICAN STEEL.

- Unlike all of our competitors, we provide **ZERO** castings or raw material from **NON-DOMESTIC SOURCES**.

► CAST STEEL POWER FRAME:

- **5 YEAR UNCONDITIONAL WARRANTY**, no questions asked.
- **MACHINED WROUGHT STEEL** rear foot and thrust bearing housing, not cast iron, reducing the risk of cracking due to impact or thermal shock.
- **RIBBED** creating 50% more surface area resulting in far better heat dissipation.
- **ENAMEL COATED** internals to eliminate the risk of rust in the event moisture contaminates the oil.

► SUPERIOR STANDARDS:

- **ALL ALLOYS** are available for wetted components and power frame.
- Shaft material is 316LSS – not 4140 steel with sleeve.
- **FLINGER DISK/SPLASH OIL LUBRICATION** reduces viscous drag and heat generation associated with flood oil lubrication.
- Use only genuine **SKF BEARINGS**.
- **NON-ARCING/NON-SPARKING** aluminum coupling guards.

► IN-HOUSE FOUNDRY:

- Offers superior casting quality for multiple alloy options resulting in **FAST DELIVERY**.
- **3D PRINTED PATTERNS** for superior casting repeatability and quality.
