

## TEMPERATURE SCREENINGS - Protect Yourself, Protect Your Organization

**DXP** continues to provide critical and essential services through the COVID-19 outbreak. The safety and well-being of our employees, clients and contractors remains of utmost importance.

### Thermal Imaging Technology

DXP can provide a system that monitors body temperature using **thermal imaging technology**, thereby eliminating the need for a person to be involved with the initial screening.

### On-Site Technicians

**On-site technicians** can also be provided, and will supply you with two highly trained technicians - one to operate the imaging system and one to take secondary, manual temperature readings at a secondary screening station. This **all-in-one solution** will help keep the risk out of you and your employees hands.

### Thermal Imaging System Features

- Simple to use
- Set up at a controlled entry point to facility
- Efficient - one second per person
- Pre-set alarm points that will sound if high temperature parameters are exceeded
- Data is stored so baselines can be set and referenced
- 24/7 technical support available
