

The image features a background of a blurred industrial scene with tall vertical structures, possibly a refinery or chemical plant. Overlaid on this are several large, semi-transparent geometric shapes in shades of blue and yellow. The DXP logo is prominently displayed in the upper left, and the product linesheet information is in the lower right.

THE POWER OF DXPeople

D-X- people /D X 'pēpəl/- (noun)

A particular group of individuals collectively serving their customers in the best way they can while working together as one team.

Our people are the heart of our organization. DXPeople are dedicated, loyal and thrive on the act of serving customers. We are a close-knit family, and we care for our customers, suppliers and partners with the same hospitality. The values of our DXPeople shine through in each interaction in the field. We are driven by problem solving for the customer and providing the Xpertise and service you rely upon.

OUR COMPANY

For more than 100 years, DXP Enterprises has served as a leading industrial distribution expert in the industry. Product specialties include rotating equipment, bearings and power transmission, metalworking, industrial supplies and more. Our company continues to stay on the leading edge of technology, training, and products while attracting and retaining the best employees. From aviation and agriculture to fabrication and construction, we offer dedicated service and support for a variety of industries.

OUR FOCUS

At DXP, our corporate strategy is simply to be the best solution for our industrial customers. Our team is comprised of customer-driven experts in a variety of specialties, including supply chain services, pump manufacturing, and renewable energy solutions. In the best interest of our clients and partners, we maintain compliance of all statutory and regulatory requirements. DXP is committed to providing quality products and services that exceed our customer's expectations.

OUR COMMITMENT

At the center of our approach to corporate responsibility, DXP is committed to delivering transparency, both in our own operations and on behalf of our customers. We firmly believe that the power of active decision-making is the best way to achieve consistent and reliable sustainability. Our robust Environmental, Social, and Governance (ESG) Strategy will allow us to drive improvements wherever and whenever possible, all while serving our clients and protecting the environment. As we actively work internally and externally to meet ESG reporting standards, we encourage you to do the same.

SERVICE/REPAIR/ REMANUFACTURING

Pump Service & Repair Centers

65+ Repair Shops Across North America • 24 Hour Service/365 Days a Year • All Makes and Models, Big

and Small • High Specification Experience • Trained Expert Mechanics and Machinists • Experienced Field Service Technicians • Engineering and Applications Support • Preventative and Predictive Maintenance • Maintenance and Service Agreements (MSAs) • Expert Root Cause Failure Analysis

Babbitt Bearing Repair

Large steam and gas turbine and generator journal and thrust bearings • Hydroelectric turbine guide and thrust bearings • Fan bearings, including very large boiler draft fans

• Pump bearings, including large cooling water pumps • Motor bearings • Thrust bearings, including tapered land and tilt pad • Ball mill bearings • Pillow block bearings for industrial process machines • Hydrogen seals for gas filled generators • Babbitted oil seals • Toothed oil deflectors • Floating and fixed oil rings

Field Service

DXP's team of pump field service experts have experience with all major OEM brands. We know that a pump is critical to the

operation of your facility, and it is a major investment. Let us service your pump when the need arises.

Remanufactured Pumps

PumpWorks Remanufactured Pumps • Power Machinery Inc., Houston, TX

Upgrades

PumpWorks Power End Upgrade Program

Rerates

DXP's engineers and pump experts can evaluate, redesign and rerate your pump to address a change in operating range, efficiency or reliability.

ENGINEERED FABRICATION

LACT

Lease Automatic Custody Transfer skids for accurate midstream measurement of crude oil and petroleum products. We supply

several LACT units for truck loading/unloading, pipeline gathering, multi-well measurement, and a tankless unit that integrated with separators and 2-20 wells. Our LACT units are sure to meet your fabricated measurement needs.

IFS Engineered Pump Solutions

Industrial pump packages from pump selection to installation. Our capabilities cover pumps for use in firewater, chemical injection, saltwater injection, potable water,

oil pipeline, cooling water, LACT, amine, produced water systems, and more. Our 100 years of fabrication experience enables us to offer the highest quality products alongside 24/7 year-round service, factory trained technical help, field service, root cause failure analysis, safety programs, etc.

PROCESS CONTROLS & AUTOMATION

DXP is your trusted expert to provide the mechanical equipment to carry out your processes. We know how the equipment should be run to optimize the life-cycle of the parts and can engineer the automation and controls to better support the equipment and maximize your processes.

Advanced Control Systems

Our advanced control systems provide you with the capability to monitor and control multiple processes from a single interface.

Automation

Automation of process controls reduces the risk of human error and improves safety.

Training & Support

Our expert staff can provide you with the skills and knowledge you need to operate your automation system with confidence.

Predict-Plus

Predict-Plus is the only wireless and cloud connected machinery health monitor designed specifically for proactive pump monitoring.

ALWAYS ON: Predict-Plus is CONTINUOUSLY monitoring and logging your pump's health.

CLASS 1, DIVISION 1: Predict-Plus is intrinsically safe

VIBRATION: Overall RMS vibration alerts can be used to indicate a fault condition and FFT harmonic data can be used to diagnose the issue.

BEARING TEMPERATURE: Temperature is monitored via the integrated thermocouple to detect improper run conditions and failure modes.

ALERTS: Proactive Alerts send automatically via email and SMS from the Predict-Cloud.

SAFETY SERVICES

DXP safety services comprises many of the nation's most respected names in the safety industry. DXP has assembled a network of safety professionals who have built their reputations on providing reliable solutions to occupational and industrial safety problems. DXP safety services is not just any safety retail outlet, we are a comprehensive, solution-driven enterprise.

With service centers strategically located across the continent, DXP is able to provide any industry client with safety services backed by highly trained staff with years of experience, and state-of-the-art equipment. Through a series of strategic acquisitions and organic growth, we are an all-inclusive safety services provider that doesn't just lead the industry, we help define it. Trust the safety and security of your people and operations to North America's safety experts.

Technical Expertise

- Plant Turnarounds
- Equipment Rental
- Safety Supervision
- Training
- Safety Consulting
- Emergency Response
- Development of Written Safety Programs
- Safety Award Programs
- Rescue Teams
- Instrument Repair
- PPE
- Safety Products such as Arc Flash, Eye and Face, Fall Protection, Fire Protection, First Aid/Medical, Hazardous Material Handling, Lockout/Tag Out, Hearing Protection, Industrial Hygiene, Gas Detection, Sorbents, and Spill Control.

Capabilities

- Air & Cool Down Trailers
- H2S Safety Services
- Breathing Air Equipment
- Respiratory Fit Testing
- Gas Detection
- Emergency Firefighting
- Specialized & Standby Fire Protection
- Emergency Shower & Eyewash Services
- Industrial Medical Services
- Safety Advisors, Consultants & Supervision
- Confined Space Attendants & Rescue
- High Angle Rescue
- Audiometric Testing
- Industrial Hygiene
- Safety Training
- Wind Energy Safety Services
- Mine Rescue Training

Contoured B/U's • Elastomeric • Encapsulated • Metallic • Metric Sizes • O-Ring Cord • O-Ring Kits • PEEK B/Us • PTFE • PTFE B/U's

Valve Components

Face/Bonnet Seals • HP/HT Stem Seals/Sets • Metal Replacement Parts • Non-Metallic Wear components • Standard Stem Seals/Sets • Valve Seats – All Types

Bearings/Wear Components

Composite Bearings • Metallic Bearings • Non-Metallic Thermoplastic • Piston/ Rod Bearings • Piston Rings • Wear Rings

Misc. Products

Adhesives • Back Up Rings • Large Diameter (110") • Lubricants • Machined/ Injected Plastics • Ring Joint Gaskets • Sealants • Teflon Tape • Wave Springs

Gas Lift Products

Beryllium Copper Ret Rings • Copper Washers/Gaskets • Check Seats/Pads • PTFE Center Adapter • Soft Component Kits • Stem/ Seat Kits • TC Balls • TC Seats • Valve Cores • Vee Packings (Neoprene, Nitrile, Aflas & Molyglass)

Retaining Rings

Smalley • Rotor Clip

Seals – Oil Field & Specialty

National O-ring (Hutchinson Seal) • SKF • Garlock • Parker • Parco (Datwyler) • Harwal • Clark

Precision Balls

Ball Tech • Hoover Precision • TN Michigan • Hyatt Ball • NN Ball & Roller • Penn Ball

Elastomers

Ethylene Propylene (EPDM) • Explosive Decompression • Fluorocarbon (FKM) • Hydrogenated Nitrile (HNBR) • Neoprene (CR) • Nitrile /Buna (NBR) • Perfluoroelastomer (FFKM) • Resistant Materials (ED) • TFE/P Fluoroelastomer (TFE/P)Aflas

Plastics

Acetal • CTFE aka Kel-F • Nylon • Polytetrafluoroethylene (PTFE) • Polyphenylene Sulfide (PPS) • Polyetheretherketone (PEEK) • UHMW-PE

Other Materials

Ceramic • Graphoil • Phenolic • Variable Density Thermoplastic • Wire Mesh

Engineering Prototype Materials

Injection Molding • Machined Plastic • Machined Rubber • Metal to Rubber Bonding • Rubber to Plastic Bonding

Material Specification

API • ASTM • MIL STD • Norsok

Value Added Services

Bar Coding/Scanning Technologies • Custom Kits/Packaging • Dock To Stock Programs • EDI/EFT • Engineering Support • Integrated Supply Programs • Online Order Management • Product Training • SmartDocs • Summary Billing • Supply Chain Management • Systems Agreements • Value Management Surveys • Vendor Managed Inventory

Technical Support

Engineering Lunch & Learns • Compatibility Assessment • Material Development • Material Recommendation • Seal Design Assistance • Seal Failure Analysis • Specification Assistance • Tolerance Recommendation

RENEWABLE ENERGY

PRODUCTS

Biogas Pre-Treatment Skids

With decades of experience in gas conditioning, DXP is able to design, select and build the correct pre-treatment (H₂S, VOC, Siloxane removal) equipment for your biogas process. Where it is for utilization and your CHP (combined heat and power) engine for power generation applications or the complete biomethane recovery process to inject in the pipeline or load onto tanker trucks.

Biomethane Capture Systems

DXP designs complete solutions for the recovery of methane from your biodigester, landfill or any biomass application. From Pre-treatment to methane capture, DXP is able to design and select the best technology for your process conditions. Our process simulation and extensive controls, mechanical and rotating equipment expertise come together to deliver a comprehensive solution, custom built for each application.

Renewable Hydrogen Production System

DXP's Renewable Hydrogen Production Systems are designed to facilitate the generation of grey, blue or green hydrogen near the source or at the delivery point. No matter the color, our skid mounted and/or containerized packaging guarantees an on-site, on-demand delivery of clean hydrogen to your plant or equipment at adequate flows and pressures.

Chemical Injection Pumps & Systems

DXP Standard and Custom-built Chemical Injection Systems are designed, packaged and fully tested for a wide range of liquid chemical treatment applications. The complete system includes a chemical storage tank, two 100% metering/dosing pumps, instruments, tubing, valves, calibration column and filtration.

Biodiesel Slurry Pumps

Pumps and complete transfer pump systems utilizing slurry pumps that can handle oils and animal fats used in the biodiesel generation process.

Biogas Tanker Truck Loading/Offloading

Complete skid mounted systems to connect between the virtual pipelines (tube trailers) and state pipelines. Systems may include biomethane pressure reduction/pressure boosting, heating, measurement and pipeline specification control, as required.

Systems are designed for outdoor installation and can be adapted to any climate.

Bioethanol Pumps & Systems

DXP's Packaged Pump Systems are designed to transfer various industrial liquids (raw materials, water, chemicals, etc.) from into and within a process plant. The complete system includes centrifugal pump(s)/motor(s), suction/discharge piping, valving, instrumentation, controls and is designed to minimize on-site assembly.

Biofuel Plant Heat Exchangers

Heat exchangers are applied in biofuel plants, any time heat from a process is being recovered or utilized in another process (e.g. economizer or heat recovery systems). Bioethanol plants require heat exchangers for applications such as reboiler, mash heaters or overhead condensers. DXP is able to select the correct heat exchanger for all of your plant applications.

Gas Pressure Regulations & Controls

Gas Pressure Reduction Stations or Compressed Natural Gas (CNG) Decanter Systems are pre-designed, packaged and fully tested for a wide range of pipeline applications. The complete system includes a process simulation using Aspen Plus® and Aspen Dynamics®, local control panel, instruments, tubing, valves, fast acting and motor actuators, and filtration integrated on skid.

CO2 Pumping and Sequestration

CCSU (Carbon Capture, Sequestration, and Utilization) will be an integral part of the carbon footprint reduction process for any industrial facility in the future. Our process simulation capabilities and experience pumping liquids in dense and super-critical phases combine to provide a one-stop shop for all your CO2 transfer and injection applications. No matter your requirement, with our PumpWorks full line of API-610 process pumps, DXP can help you with low, medium, and high-pressure CO2 pumps and pumping systems.

Particle Filtration Systems

Filtration Packages are designed to filter particulate from any process before entering the reactors. DXP's Filter Packages extend the life of the catalyst and reduce catalyst regeneration cycles.

Balance of Plant Equipment

DXP is the one stop shop for your biofuel generation pumping and process related needs. This includes including boiler feed pumps, wastewater transfer, cooling water, water supply, feed pumps as well chemical transfer and storage systems.

Renewable Oil Blending Systems

Packaged liquid blend Systems designed to minimize on site installation costs by modularizing the complete Liquid Blending System – kettle, mixer(s), material lift, PLC controls, instrumentation, & electrical switchgear. Packaged Liquid Blending

Systems are used for blending solid or granular polymers in a liquid base material. Typical applications include blending finished products such as motor oil base stock, asphalt extenders, paint and adhesives.

Plant Ammonia Handling for NOx Emission control

Ammonia Unloading, Storage, Distribution & Vaporization System is designed to provide ammonia (anhydrous or aqueous) reactant to a Selective Catalytic Reduction (SCR) unit for removal of NOx from flue gas. Ammonia is delivered by truck or railcar and unloaded into storage tanks. The ammonia is forwarded to the Ammonia Flow Control Unit (AFCU) which generates ammonia gas for injection into the flue gas upstream of the SCR. IFS provides the complete system.

Design & Fabrication of Process Plant Modules

DXP's process capabilities allow us to engineer and build modular gray, blue and green hydrogen generation systems. Hydrogen modules are either build-to-order or engineered to optimize our customer's process requirements (the latter utilizing Aspen HYSIS process simulation software). Whether skid mounted or containerized, our packages are designed as truckable modules for ease in transportation worldwide and minimum site installation time.

Condition Monitoring

With the use of PumpWorks' cloud based Predict-Plus Remote Pump Monitoring systems, DXP is able to provide plant equipment vibration and temperature monitoring and trending. PumpWorks Predict Plus utilizes a cellular based communications platform that allows data visualization and storage for temperature, RMS vibration and Fast Fourier Transform (FFT) on any computer or mobile device across the North American and in over 107 different countries.

Automation & Power Control Buildings

Automation and Control systems are designed to monitor and control the packaged equipment. The controls can be skid mounted and prewired or remote mounted in an unclassified electrical area. Optionally, the control system can interface with

the customer's plant control system. A typical control system includes a NEMA enclosure, power distribution components, control power components, programmable controller and on-skid wiring in conduit.

Vacuum Pumps & Compressors

Liquid Ring Vacuum Pumps and Compressors are widely utilized in the biofuel industry. In bioethanol plants, Liquid-Ring Vacuum pumps are used in the distillation and rectification process as well as during the mash liquefaction and drying cycles. By operating under vacuum, the energy consumption of the process is reduced. In the biodiesel industry, liquid ring vacuum pumps and compressors are applied during the separation of biodiesel and glycerine among other filling and emptying applications.

Geothermal Brine Re-injection Pumps

DXP offers API-610 and non-API pumps with the specific metallurgy required to handle the scaling, corrosion and potential high temperatures observed in brine re-injection. These pumps are used in Carbon Capture, Utilization and Storage (CCUS) processes. With over 100 years of experience in rotating equipment selection and application, DXP can offer the complete pump, auxiliary and control system for any of your geothermal fluid transfer or injection needs.

Lobed Blowers

Lobed Blowers are used in ethanol plants for pneumatic conveying of grains/corn into silos from truck as well as the movement of grain/corn around the plant. DXP has a complete line of blowers in order to provide the best fit for your application.

Biogas Digester Feed/Circulation Hose Pumps

Hose Pumps are the most reliable way to feed biomass into anaerobic digesters. These low maintenance, high reliability pumps can handle grass, straw, manure and any solids (fiber, dry matter and soil/debris) being fed. Hose pumps are also used to circulate biomass between digesters. Whether stand alone or skid mounted or containerized, DXP provides the right solution for your application.

Fuel Gas Conditioning

DXP Fuel Gas Conditioning Skids are designed to protect natural gas fueled engines and turbines from liquid slugs, solids (< 0.1 microns) and liquid aerosols. Additionally, the fuel gas is superheated above the hydrocarbon and water dew points to prevent liquid condensation in the turbine's combustion chambers. These systems meet or exceed reciprocating engine and turbine manufacturers' fuel gas quality specifications providing dry, clean fuel to increase the life of the equipment.

Isoboost System

IsoBoost is a hydraulic system that recovers pressure energy, reduces power consumption and increases the reliability of pumping systems.
