

DXP

INNOVATIVE PUMPING SOLUTIONS

MARKETS

Oil & Gas
Clean Energy
Emission Reduction

*Pumpworks API-610
Crude Oil Shipping
Pump Package*

UPSTREAM OIL & GAS INDUSTRY

DXP offers an extensive line of modular packages for the upstream oil and gas industry.

Sea Water Injection Packages

Produced Water Disposal Systems

Sump Pump and Tank Systems

Oil Shipping Pump Packages

Fuel Gas Conditioning Modules

Crude Oil Heating Packages

Wet/Dry Oil Pump Packages

Heat Medium Systems

*Crude Oil Pipeline
Metering Skid*

MIDSTREAM OIL & GAS INDUSTRY

DXP specializes in configured-to-order measurement and pumping packages for the midstream oil and gas industry.

Pipeline Pump Packages

LACT Units

Transloading

Liquid and Gas Measurement Systems

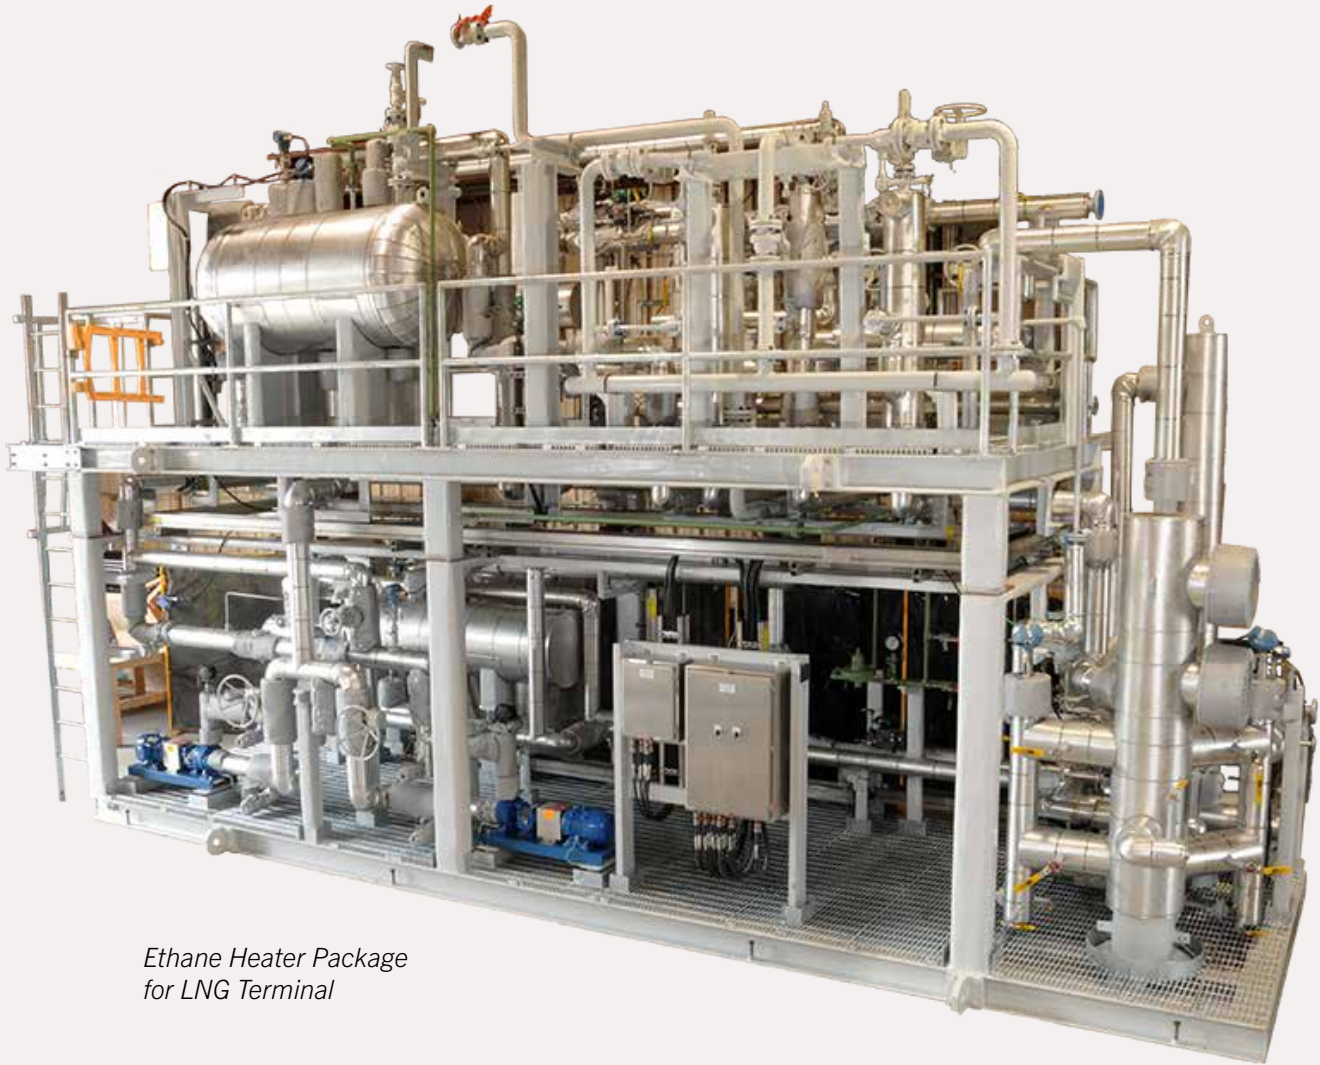

HP+ Horizontal Pump Packages

Arctic Climate Packages

JT and Membrane Gas Treatment

Screw and Reciprocating Compression

Sump Pump and Tank Systems

*Ethane Heater Package
for LNG Terminal*

LNG/ DOWNSTREAM INDUSTRY

**DXP offers an extensive line
of modular packages for the
downstream oil and gas industry.**

Process Pump Skids

Filtration Packages

Fuel Gas Conditioning Packages

VOC Recovery Packages

Chemical Injection Systems

Lube Oil Blending Packages

SCR Support Packages

Electric Process Heating Packages

Sump Pump and Tank Systems

Ammonia Flow Control Unit

ENVIRONMENTAL/ AIR QUALITY INDUSTRY

DXP offers an extensive line of modular packages for the power generation industry and air quality industry.

Pressure Reduction Stations

Turbine De-icing Packages

Balance of Plant Equipment

SCR Support Packages

Ammonia Flow Control Packages

Ammonia Storage and Forwarding Packages

Ammonia Storage and Vaporizer Packages

Ammonia Unloading Packages

*Bioethanol
Plant DXP ANSI
Process Pump
Skid*

BIOFUEL INDUSTRY

Through our comprehensive line of pumps, plant equipment and services, DXP is the best partner for the bioethanol, green diesel and SAF industries.

Fermenter Drain and Transfer Pumps

Chemical Transfer Pumps

Slurry Pumps

Distillation Vacuum Pumps

Rotary Lobe Blowers

Plate and Frame Heat Exchangers

Condition Monitoring

Shell and Tube Heat Exchangers

Balance of Plant Equipment

Clean hydrogen controls and water treatment module

RENEWABLE ENERGY

DXP is at the forefront of clean hydrogen production and balance of plant equipment packaging. We can also support your critical mineral and geothermal projects.

Green H2 Production Modules

Clean Hydrogen Control Modules

Hydrogen Compression Packages

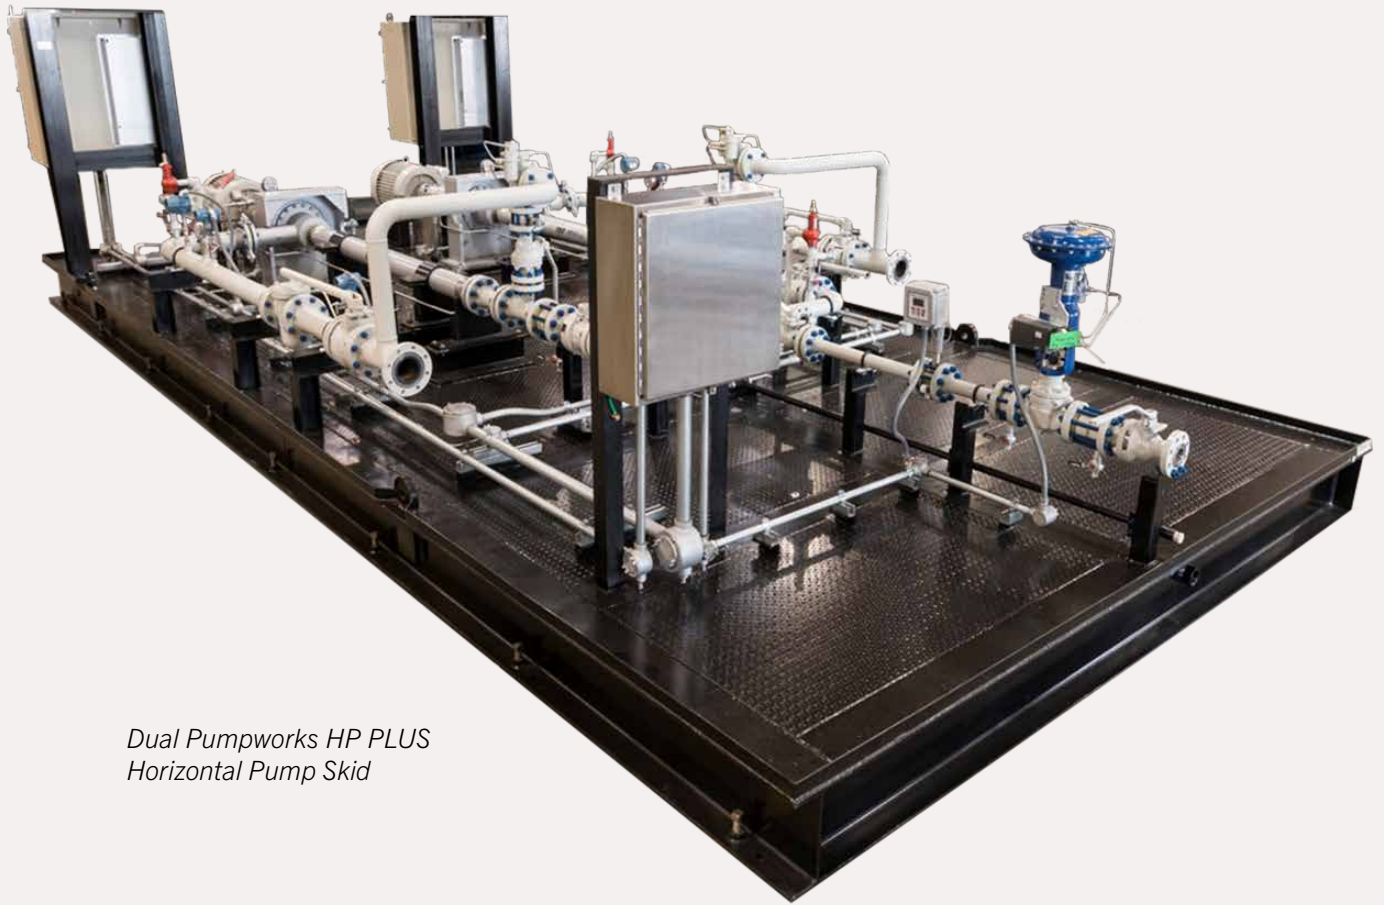

H2 Unloading and Measurement

Renewable Lube Oil Blending Skids

Slurry Pumps for Geothermal Plants

Lithium Brine Pumping and Filtering

Biogas Upgrading Systems

*Dual Pumpworks HP PLUS
Horizontal Pump Skid*

CARBON CAPTURE, USAGE & STORAGE (CCUS)

With decades of CO₂ pumping experience, DXP can help you design, size and supply your super critical CO₂ handling equipment.

HPP Plant Side CO₂ Pumping Modules

Carbon Capture Plant CO₂ Measurement

CO₂ Capture Process Pumps

API-610 CO₂ Pipeline Pumps

HPP and API Sequestration Pumps

CO₂ Unloading and Storage System

Super Critical CO₂ Process Design
