

PREMIER *flow*

A DXP COMPANY

Engineered Packaged Systems Built for Performance

From domestic water boosters and fire protection systems to HVAC and custom industrial packages, PREMIERflow delivers third-party certified engineered pump systems designed for demanding commercial, municipal and industrial applications.

44 Years of Excellence

WHY PREMIER *flow*

THIRD-PARTY CERTIFIED

- › UL / cUL
- › ETL / cETL
- › NFPA 20 Listed
- › NSF 61 & 372 Certified

DESIGNED IN-HOUSE

- › Complete engineering
- › AutoCAD & 3D Inventor design
- › Custom controls
- › BACnet & Modbus communications

MANUFACTURED FOR QUALITY

- › UL508 Control Panel Shop
- › ASME Certified Welding
- › NIST Traceable Testing Facility
- › Factory Performance Testing

INDUSTRIES SERVED

Commercial Buildings

Healthcare

Educational Facilities

Municipal Water & Wastewater

Data Centers

Hospitality

Industrial Manufacturing

Oil & Gas

Power Generation

THE DXP ADVANTAGE

As part of DXP Enterprises, PREMIERflow delivers engineered solutions tailored to every application, backed by specialized engineering expertise and a nationwide network of service, support, and distribution trusted by customers across the country.

DOMESTIC WATER BOOSTER SYSTEM

Premier Flow offers standard and custom booster system designs that provide excellent operating efficiency and are compliant with various hygienic standards, including NSF/ANSI-372 pump systems for domestic drinking water.

FIRE PROTECTION SYSTEMS

When you need a dependable fire pump system, look to Premier Flow for standard or custom fire pump system designs and equipment. They meet all safety standards and are factory hydro and electric tested. They can come skid-mounted or use pre-fabricated enclosure designs.

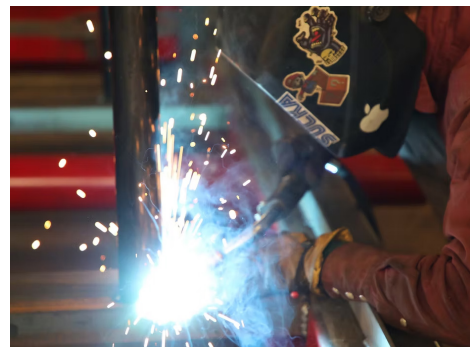

HVAC & HEAT TRANSFER

Variety of packaged heat transfer pump systems, including shell and tube heat exchangers, plate and frame heat exchangers, snow melt systems, steam control valve assemblies, condensate assemblies and complete water assemblies with constant or variable designs. Premier Flow HVAC Packaged Systems are also expertly engineered and constructed for high-grade commercial and industrial applications.

CUSTOM INDUSTRIAL SOLUTIONS

For all the same water supply applications listed above, Premier Flow manufactures industry-specific packaged systems designed and built with your plant's needs in mind.

Whether you need a standard booster package or a fully customized engineered system, PREMIERflow delivers complete packaged solutions designed for performance, reliability and compliance.
